SUMMARY

Security Engineer with 1.5+ years of experience in web, API, mobile, and network penetration testing, secure code review, and Secure SDLC / Shift-Left implementation. Skilled in identifying and validating real-world vulnerabilities, with public disclosures including an OTP bypass and prompt injection issues in AI-integrated applications. Currently building toward Product Security Engineering, with growing focus on threat modeling and DevSecOps practices.

TECHNICAL SKILLS

Languages: Python, JavaScript

Application Security: Secure SDLC, Shift-Left Security, Threat Modeling (STRIDE), Secure Code Review, SAST, DAST, Software Composition Analysis (SCA), OWASP Top 10, OWASP API Top 10

DevSecOps / CI-CD: CI/CD Security Pipeline, Semgrep (Custom Rules)

Cloud & Infrastructure (Familiar with): Docker, Container Security Fundamentals, AWS Security Fundamentals.

Security Tools: Burp Suite, Nmap, Nessus, Metasploit, SQLMap, Wireshark, MobSF, Frida, Jadx, Apktool

Networking: HTTP/HTTPS, DNS, FTP, TCP/IP, UDP, Network Protocol Analysis

Vulnerability Classification: CVSS, CWE, Risk Assessment, CERT-In Compliant Reporting

Operating Systems: Kali Linux, Linux Fundamentals

EXPERIENCE

Junior Security Engineer

Feb 2025 – Present

Intelliroot Technologies (OPC) Pvt. Ltd.

Bangalore, India

- Executed end-to-end security assessments (Web, API, Mobile, Network) for 70+ client products, uncovering critical business logic flaws and reducing deployment risk.
- Conducted source code reviews, Static Application Security Testing (SAST), and Software Composition Analysis (SCA) to identify insecure coding practices and vulnerable third-party dependencies.
- Collaborated with development teams on Secure SDLC and Shift-Left Security activities, identifying and remediating security issues during early stages of the development lifecycle.
- Tested authentication, authorization, and session management controls against OWASP Top 10 criteria; developed Proof-of-Concept (PoC) exploits to demonstrate real-world business impact.
- Used Burp Suite, Nmap, Nessus, Metasploit, MobSF, Frida, and Wireshark to execute assessments and validate findings.
- Prepared detailed VAPT and CERT-In compliant reports covering risk assessment, business impact analysis, and remediation guidance for stakeholder communication.

Cybersecurity Intern

Sep 2023 – Oct 2023

SenseLearner Technologies Pvt. Ltd.

India

- Applied penetration testing and incident response fundamentals to practical cybersecurity assessments.
- Conducted vulnerability assessments using Nmap and Burp Suite.

VULNERABILITY DISCLOSURES

- Reported an OTP bypass vulnerability in the authentication workflow of **Max Healthcare**.
- Identified a sensitive configuration disclosure, HTML Injection, Session related vulnerabilities at **Deutsche Telekom**.
- Reported two information disclosure vulnerabilities at **Stanford University**.
- Identified three information disclosure vulnerabilities and one security misconfiguration at **Tata Motors**.
- Identified prompt injection vulnerabilities in AI-integrated client applications.

CERTIFICATIONS

- Certified Ethical Hacker (CEH) v13 – EC-Council
- Certified Network Security Practitioner (CNSP) – The SecOps Group
- Website Hacking Techniques – CodeRed by EC-Council

EDUCATION

Prof. Ram Meghe Institute of Technology & Research, Badnera

2020 – 2024

Bachelor of Engineering in Computer Science Engineering

CGPA: 7.81 / 10
