SUMMARY

Security Engineer with 1.7+ years of experience in web, API, mobile, and network penetration testing, secure code review, and application security testing. Skilled in identifying and validating real-world vulnerabilities through manual and tool-assisted testing (SAST/DAST), with public disclosures including an OTP bypass and prompt injection issues in AI-integrated applications. Focused on strengthening application security through hands-on testing, secure code review, and vulnerability remediation.

EXPERIENCE

Junior Security Engineer

Intelliroot Technologies (OPC) Pvt. Ltd.

Feb 2025 – Present

Bangalore, India

- Executed end-to-end security assessments across Web, API, Mobile, and Network environments for 70+ client products, identifying critical technical and business logic vulnerabilities.
- Conducted secure code reviews and Static Application Security Testing (SAST) to identify insecure coding practices and application security weaknesses.
- Tested authentication, authorization, session management, and business logic controls against OWASP Top 10 and developed Proof-of-Concept exploits to demonstrate impact.
- Prepared VAPT and CERT-In compliant reports covering risk assessment, business impact, technical evidence, and remediation recommendations.

PROJECTS

SecureFlow – AI-Assisted Static Application Security Testing Platform

Live Application

- Developed and deployed a multi-language SAST platform for **Python, JavaScript/TypeScript, PHP, Java, and Go** using AST-based, interprocedural, and cross-file taint analysis.
- Detects **SQL Injection, XSS, Command Injection, SSTI, SSRF, Path Traversal, XXE, NoSQL Injection, unsafe deserialization, JWT weaknesses, and hardcoded secrets**, with source-to-sink tracing and confidence-aware findings.
- Built coverage visibility, suppression workflows, technical/executive PDF reports, authentication, password recovery, project/scan management, and deployed using **Render, Supabase PostgreSQL, and Brevo API**.

TECHNICAL SKILLS

Application Security: Threat Modeling (STRIDE), Secure Code Review, SAST, DAST, OWASP Top 10, OWASP API Top 10

Security Tools: Burp Suite, Nmap, Nessus, Metasploit, SQLMap, Wireshark, MobSF, Frida, Jadx, Apktool, SonarQube, Semgrep

Networking: HTTP/HTTPS, DNS, FTP, TCP/IP, UDP, Network Protocol Analysis

Vulnerability Classification: CVSS, CWE, Risk Assessment, CERT-In Compliant Reporting

Operating Systems: Kali Linux, Linux Fundamentals

VULNERABILITY DISCLOSURES

- Reported an OTP bypass vulnerability in the authentication workflow of **Max Healthcare**.
- Identified sensitive configuration disclosure, HTML Injection, and session-related vulnerabilities at **Deutsche Telekom**.
- Reported information disclosure and security misconfiguration vulnerabilities across **Stanford University** and **Tata Motors**.

ACHIEVEMENTS

- Essential, Web Fundamentals, HTTP, API Badges – **PentesterLab**

CERTIFICATIONS

- Certified Ethical Hacker (CEH) v13 – **EC-Council**
- Certified Network Security Practitioner (CNSP) – **The SecOps Group**

EDUCATION

Prof. Ram Meghe Institute of Technology & Research, Badnera

Bachelor of Engineering in Computer Science Engineering

2020 – 2024

CGPA: 7.81 / 10
